

Preliminary Concept of Birth Date _____ Page _____

→ Pre conceptional care in ayurveda for the purpose of beejsudhi and beejposhan.

- fertility is the natural capability to produce offspring.
- but the fertility rate decreased due to era of stress, competition.
- Solution are need for this problem.

➤ Pregnancy Should be By Choice, Not By Chance.

This statement holds true for having a safe pregnancy and healthy progeny.

- Due to competitive life, the advance generation desire only one child and willing that their child should be Physically, Mentally and intellectually Stronger than them.

→ But in this stressful and busy society coupled give more importance to career than family.

→ So not paying attention towards proper marital age, Sex timing, dincharya, Ritucharya.

→ As a result, they are more prone to physical & psychological problems for self and could convey to the next generation.

→ So in the way of Receiving a healthy progeny, a woman should be carefully monitored in all stages of pregnancy like pre-conceptional, prenatal, intra-natal and post-natal.

- Garbhadhana - The Regimen followed during pre-pregnancy period to achieve conception is called Garbhadhana vidhi.

→ Specific guidelines have been described in Ayurveda for pre-conceptional care. Such as Rajaswalacharya (mode of living during menstruation), appropriate age of Marriage and Conception, factors essential for Conception.

Ayurvedic Preconceptional Care

Valour - वीरता
Vigour - ताकत

Date _____

Page _____

- Preconception care begins with the selection of the right partners.
- Ayurveda mentions male at the age of 25 and female the age of 16-18 are fully mature and eligible for conception.
- as both at this age are full of Valour and Vigour
- Very young or old women should not be impregnated.
- Atulya Gotra - For marriage the women should be belong to the the same community but of different gotra.
- gotra - different family lineage.
- then an intelligent and healthy child is born.
- this might be to reduce the risk of hereditary disease and to avoid Congenital anomalies.
- Early pregnancy increased the risk of NTD'S IUGR Preterm birth, Still birth etc.
- Late pregnancy increased the risk of Down's syndrome etc.

➤ Importance of Rutukala in Conception.

- This is Rutukala is a period of ovulation. Conception on successive days of Rutukala promotes a child who has long-life span, good health, fortune/prosperity energy.

➤ Rajaswalacharya - Regimen During Menstruation

- Discipline during Menstruation

- (i) Rest to woman who working hard
- (ii) must avoid sexual intercourse
- (iii) avoid day-sleep, work.
- (iv) eat meal made of ghrita, Sali and milk.
- (v) avoid hot pungent and salty food.

गर्भ संग्रह ➤ Garbh Sambhav Samagri (सामग्री)

aggravated - बहुत बढ़ा

Date _____ Page _____

→ factors essential for conception.

• Vata is known prana (प्राण) or life energy.

→ The apana vata one of the five types of vata is naturally Responsible for menses, secretion of Semen and elimination of urine and stool.

→ When vata gets aggravated it is unable to carry out its natural function and can create semen related disorders, also lead irregularity in menstrual cycle.

• Ayurveda describes four factors essential for conception -

(i) Rutu - (Rutukala or ovulation period)

(ii) Kshetra - (garbhasaya or healthy uterus)

(iii) Ambu - (Rasa dhatu or nourishment)

(iv) Bija - (Sukra and ootava or healthy gametes)

→ When the four factors come together conception is bound to occur just like a seed germinates.

→ Vayu (वायु) plays a very important role from maturation of gametes, fertilization to foetal nourishment also it functions as maturation and ejaculation of semen.

• Vaaryu → On the fourth day of menstruation the women should take head bath.

→ Should wear white clothes, garlands, flowers.

♥ → She should see her husband first ♥

→ The psychological state of mind of the couple during rutukala would influence the outcome.

• Yoga and Pranayam important for male - Preconceptional.

Yoga - Preconceptional.

Date _____ Page _____

- for male-asana such as sarvangasana, matsyasana, shirshak ana, bhujang asana.
- for female asana - paschimottanasana, pawan mukadama, shavasana, bhujangasana, hastapadsana etc.
- Hridaya - After menstruation the following Karmas should be followed by the couple who yearns for a progeny.
 - Hridya means happy and pleasant mind.
 - It is important factor for receive good ind offspring.
 - avoid- violence

Concept of Garbhadhana - Conception.

- Ayurveda During garbhadhana (conception)
 - The couple has to undergo Sneh, Sweda, Sodhana.
 - The man is given madhura drugs processed with milk and ghee.
 - The ghee has the property of nourishment and strengthen the body.
 - It makes the Sperm healthy and Vigour.
 - Milk give strength - nourishes the body, and increase the quantity and quantity of Sperm.
 - The women are given tila, masa etc.
 - tila (sesamum oil) - It has property of garbhasaya shodhan and bidosha Shamak.
 - Masa (black gram) - contain vitamin B, folic acid magnesium, iron and calcium which are essential factors for conception.
 - couple should be happy and cheerful.
 - Putresti yagya - ritual that provide physical & psychological calmness to both partners.

→

Concepts of Chikitsya Purush

Date _____

Page _____

- The term Purusha is the synonym of Brahma.
- Purusha is general terms means man, usually used to denote human being.
- But in Ayurveda Purusha is the term given to explain Chetana Dhatu or Atma or the Soul or life.

• Chikitsya or Shad Dhatwatmaka Purusha.

- Also known as Karmapurush.
- Have six elements - Panchamahabhutas and Jeevatma.
- Panchamahabhutas - 5 basic elements of nature
- Jeevatma ÷ Soul
- Pritvi (earth element) • Ap or Jala - water element
- Teja or Agni - fire element, • Vayu - Air element
- Akasha - Space (Sky) • Shroetri - Chetana, Soul
- Only 'Human being' but not any other living being because all the treatment and other aspects of medicine deal with ~~only~~ purusha.
- This indicates that the anatomy, physiology, pharmacology, therapeutics, hygiene etc of this medicine are described in the interest of human being.

Introduction of Marma

Date _____ Page _____

- Marma Points - is a branch of Science which has reference in Vedas, scripture, literature etc.
 - Marma means "Vital Points" that hold life force energy.
 - also known as vulnerable spots.
 - Marma simply defined as the junctures in the body where two or more tissue meet, i.e. muscles, vessels, bones, ligaments and joints.
 - 107 marma points in the body
- Marma points Massage - is a full or a part body treatment, differing from most other types of therapies in way that the practitioner uses fingers, knuckles and thumb to press the specific points.
- Benefits of Marma points -
 - ① In detoxifying the mind body, emotions and spirit.
 - ② Relieve deep seated tension.
 - ③ Deepen the breathing patterns, relieve asthma & anxiety.
 - ④ Clear troublesome emotions and psychological blocks.
 - ⑤ Improve circulation and energy flow.
 - ⑥ Encourage self healing
 - ⑦ Improve the health

(Introduction of Nadi - Ida, Pingla, Sushumna)

Date _____ Page _____

- Nadi - is a term for the channels through which in through energies such as Prana is flow.
(• TTS) - tube, pipe, nerve, blood vessel, pulse)
- All nadis are said to be originated from one of two centres - the heart and the kanda - egg
- Kanda - egg shaped bulb in pelvic area.
- Through yoga the channels can be unblocked then energy properly flow.
- They carry prana, life force energy.
- In physical body the nadis are channels carrying air, water, nutrients, blood and other bodily fluids.

• Central Channel - Sushumna

- central and important channel.
- It connects the base chakra to the crown chakra
- It is important in Yoga and Tantra
- It corresponds to the river Saraswati.

→ Left Channel - Ida

- associated with lunar energy.
- the word means Ida - comfort
- It has a moon like nature and feminine energy with cooling effects.
- It courses from the left testicle to the left nostril.
- It correspond to the Ganga river.

→ Right Channel - Pingala

- It is associated with solar energy.
- Pingala means orange - denote sun so sunlike energy and masculine energy.
- Its temperature is heating and courses from right testicle to Right nostril.
- It corresponds to river Yamuna.

Introduction of Srotas

Date _____ Page _____

- Ayurveda has accepted the human body to be made up of innumerable Srotas (channel).
- Which are responsible for performing all the physiological and functional activities.
- All dosha, dhatu and mala perform their functional activities with the help of these Srotas.
- Thus, they are the channels or pathways of the body through which the material needed for tissue building, nutrition and nutrient flow from one corner of the body to other.
- According to Sushruta those which carry or transport materials like prana (Life element), Anna (food), Vari (water), Mamsa, Meda Dhatu are called Srotas.
- Srotas are the complex pathways or channels of the nervous system governed by Vayu for carrying out the functional and physiological activities of the human body.
- following synonyms - Sira (Vein), Dhamani (Artery), Rasayani (Lymphatic ducts), Rasa vahini (Capillary), Panth (Passage), Nadi (Tubular conduits) etc.
- Types of Srotas:
 - Manovaha Srotas - carries impulses of thoughts and emotions.
 - Stanyavaha Srotas - Channels which carry Stanya - Breast Milk.
 - Shabdavaha Srotas -
 - Samyjevaha Srotas - Carry budbhi
 - Swaravaha Srotas - Carry Shabda

Introduction of Roga and Vikrit Vigyan

Date

Page

→ Roga in a Sanskrit word that means "illness or disease"
~~etc.~~ example -

- Grahani Roga - A disease of the gastrointestinal tract.
- Udara Roga - a disease that can cause weakness of the limbs, swelling, nausea and other symptoms.

* Vikrit Vigyan (Roga-nidan) (Pathology)
↳ Study of disease.

- Rog Nidanam Vikrit Vigyan is an essential part of Ayurveda that is useful in early diagnosis of disease and deals with classification of disease and Techniques of diagnosis.

→ Vikrit Vigyan deals with the factors which are important to understand to the origin of disease as well as pathogenesis, diagnosis and investigations of the disease.

→ It also deals with etiopathological and clinicopathological studies of diseases.

• Kriya-Kala - (Pathological Aspects)

Date _____ Page _____

"Prevention is better than Cure"

- Kriya-Kala (pathological aspects) - The art of understanding a disease and its stage of pathogenesis.
 - accurate diagnosis
- Aim - diagnosing a disease at its budding or earliest level.

➤ Shat Kriya Kala - (Shat-6) (Kriya-Action, Treatment)
↳ Period or Time

↳ Appropriate time periods to take action or plan.

- We know that for any disease process to start, there should be some causative factors on its backdrop.
 - The causative factors of a disease are called 'Nidana' in Ayurveda.

➤ The Nidana may be of 2 Types -

(i) Bahya Nidana - external factors or causative factors.

→ causative factor supplied from the outside

example - infections (microorganism), exposure to dust, smoke or allergies, incompatible foods, injuries etc

→ These effect Doshas.

(ii) Abhyantara Nidana (Internal or Intrinsic causative factor of disease)

→ combinations are the internal factors of causing a disease - The vitiated Doshas, Vata, Pitta and Kapha

• either in independently or

eg - damage of tissue.

The disease is a game of Doshas

Vitiation - विटिग जीना

Date _____ Page _____

- The Dosha's take their time in getting through various stages of Vitiating and gradually give origin to a disease.
- In the initial stages the Dosha's increase in quantum at their own sites and later tend to trespass into the sites.
- The Dosha's overflow and spread all through the body in search of ~~weak~~ weak, susceptible dhatus (tissue) when find then occupy and damage the tissues.
- When the damage get severe the disease gets manifested with full blown sign and symptom then diseases is not treated even in this stage, due to complications.
- Dosha Kriyakala - If the disease is diagnosed and treated in these earlier stages of pathogenesis,
 - the dosha's can be stopped from progressing to the further stages of pathogenesis.
 - This stage is called Dosha Kriyakala because here only the Dosha's get disturbed. They not harm in this stage.
- Three stages
 - (i) Sanchaya or Chaya - Stage of accumulation of Dosha's.
 - (ii) Prakopa - Stage of aggravation
 - (iii) Posara - Stage of liquification and spreading of Dosha's.
- Vyadhi Kriyakala - The later stages of the disease wherein the vitiated dosha's (not diagnosed)
 - The disease is not managed in this stages due to complication of disease.
- ① Sthana Samashraya - Stage of invasion of tissue and lodgement.
- ② Vyakta - Stage of manifestation of disease.
- ③ Bheda - Stage of complications.

Classification of Kriya Kala

• Charaka and Vagbhata have explained ^{Date} three ^{Page} Stages.

(i) Vata Dasha-

- ⊛ Sanchaya - take place in Summer Season
- ⊛ Prakopa - takes place in Varsha Ritu. (Monsoon)
- ⊛ Prashamana - takes place in Autumn Season.

(ii) Pitta Dasha

- Sanchaya - monsoon (Varsha Ritu)
- Prakopa - autumn (Sharad Ritu)
- Prashamana - early winter (Hemanta Ritu)

(iii) Kapha Dasha

- Sanchaya - Shishira Ritu (late winter)
- Prakopa - Vasanta " (spring season)
- Prashamana - Greeshma " (summer season)

➤ Shat Kriya Kala - Six Stages of disease manifestation.

- (i) Sanchaya or Chaya - Stage of accumulation of Doshas.
- (ii) Prakopa - Stage of aggravation
- (iii) Prasara - Stage of liquification and Spreading of Doshas.
- (iv) Sthana Samshraya - Stage of liquification and Spreading of Doshas.
- (v) Sthana Samshraya - Stage of invasion of tissue and lodgement of the Doshas in Dhatus.
- (vi) Vyakta - Stage of manifestation of disease
- (vii) Bheeda - Stage of complications

Principles for people to avoid disease.

Date _____

Page _____

→ 61% death due to disorders in India - due to lifestyle
• primary factor cause disease - alcohol, Tobacco, poor diet
mental stress.

• Ayurveda describes several principles to prevent disease

⊗ for life-style -

(i) Dinacharya - daily routine - improve.

(ii) Ritucharya - provide routine of Seasonal Routine

(iii) Sadvratu - code of conduct.

⊕ Seven principles are essential to follow to lead a healthy life -

(i) Tri-upstairs - (Ahara, Vihara, Brahmacharya)

↓
Diet, lifestyle, Satvik life
↘ main pillars of health

(ii) Dinacharya - The routine of daily life

(iii) Ritucharya - The routine of Seasonal - life

(iv) Avoidance of Vegadharana - Suppression of natural urges.

(v) Avoidance of Rajnupradha - Renunciation

(vi) Sadvratu - good ^{code of} conduct of conduct)

(vii) Yoga - to avoid mental stress.
