- A. Dosha and Dhatu
- B. Atma and Indriya
- C. **Shukra, Shonita and Atma**
- D. Panchamahabhuta only

Correct Answer: C

3. The term Shukra in the context of birth refers to:

- A. Menstrual blood
- B. Ovum
- C. **Male reproductive element (semen)**
- D. Nutritional essence

Correct Answer: C

4. Shonita in Ayurveda represents:

- A. Bone marrow
- B. Blood circulation
- C. **Female reproductive element (Artava)**
- D. Breast milk

Correct Answer: C

5. Which factor is considered essential for life to enter the embryo?

- A. Dosha
- B. Agni
- C. **Atma (Soul)**
- D. Ojas

Correct Answer: C

6. Without which of the following, conception is not possible according to Ayurveda?

- A. Proper diet
- B. Healthy lifestyle
- C. **Union of Shukra, Shonita and Atma**
- D. Balanced Tridosha

Correct Answer: C

7. The Ayurvedic concept explaining the development of the body structure is:

- A. Vikriti Vigyan
- B. **Rachana Sharir**
- C. Swasthavritta
- D. Kriya Sharir

Correct Answer: B

8. The physical formation of the fetus mainly depends upon:

- A. Atma alone
- B. Mind of mother
- C. **Shukra and Shonita**
- D. Prakriti only

Correct Answer: C

9. Which element decides consciousness and life in the fetus?

- A. Dosha
- B. Dhatu

- C. Atma
- D. Mala

Correct Answer: C

10. According to Ayurveda, birth is a result of:

- A. Random biological process
- B. Mechanical fusion
- C. **Natural and metaphysical union**
- D. Only physical factors

Correct Answer: C

11. The preliminary concept of birth in Ayurveda emphasizes:

- A. Only anatomy
- B. Only physiology
- C. **Physical, mental and spiritual aspects**
- D. Chemical composition

Correct Answer: C

12. Which philosophy strongly influences the Ayurvedic concept of birth?

- A. Materialism
- B. Positivism
- C. **Indian metaphysics**
- D. Western biology

Correct Answer: C

13. In NEP-based Ayurveda syllabus, "Preliminary Concept of Birth" is included under:

- A. Dravyaguna
- B. **Rachana Sharir**
- C. Rasa Shastra
- D. Swasthavritta

Correct Answer: B

14. The concept of birth in Ayurveda reflects:

- A. Disease-centered approach
- B. Surgery-centered approach
- C. **Holistic view of life**
- D. Drug-centered approach

Correct Answer: C

15. According to Ayurveda, human birth is possible only when:

- A. Parents are healthy
- B. Tridosha are balanced
- C. **Physical and spiritual elements unite**
- D. Proper nutrition is taken

Correct Answer: C

MCQs: Preliminary Concept of *Chikitsya Purusha*

1. In Ayurveda, *Chikitsya Purusha* refers to:

- A. Only the physical body
- B. Only the mind
- C. The soul alone
- D. **The complete living individual eligible for treatment**

Correct Answer: D

2. The concept of *Chikitsya Purusha* emphasizes:

- A. Disease-centered approach
- B. Medicine-centered approach
- C. **Patient-centered holistic approach**
- D. Surgery-centered approach

Correct Answer: C

3. According to Ayurveda, *Chikitsya Purusha* is composed of:

- A. Panchamahabhuta only
- B. Tridosha only
- C. **Sharira, Indriya, Satva, and Atma**
- D. Dhatu and Mala only

Correct Answer: C

4. Which of the following is NOT a component of *Chikitsya Purusha*?

- A. Sharira (Body)
- B. Satva (Mind)
- C. Atma (Soul)
- D. **Desha (Habitat)**

Correct Answer: D

5. *Sharira* in *Chikitsya Purusha* mainly represents:

- A. Psychological constitution
- B. Spiritual entity
- C. **Physical body structure**
- D. Moral conduct

Correct Answer: C

6. *Satva* as a component of *Chikitsya Purusha* denotes:

- A. Digestive fire
- B. Sensory organs
- C. **Mental strength and psychological constitution**
- D. Muscular strength

Correct Answer: C

7. *Atma* in the concept of *Chikitsya Purusha* is responsible for:

- A. Digestion
- B. Circulation
- C. Sensory perception
- D. **Life and consciousness**

Correct Answer: D

8. Which classical principle supports the concept of *Chikitsya Purusha*?

- A. Rogasya Rogam Moolam
- B. Swasthasya Swasthya Rakshanam
- C. **Purusham Purusham Vikshya**
- D. Desha-Kala-Patra

Correct Answer: C

9. *Purusham Purusham Vikshya* means:

- A. Treat disease with same medicine
- B. Treat symptoms only
- C. **Treat every individual as unique**
- D. Treat according to season only

Correct Answer: C

10. Why is *Chikitsya Purusha* important in Ayurveda?

- A. It defines surgical methods
- B. It explains pharmaceutical preparation
- C. **It guides individualized treatment planning**
- D. It explains disease classification

Correct Answer: C

11. In Ayurvedic treatment, medicine is selected based on:

- A. Disease name only
- B. Dosha dominance only
- C. **Complete assessment of *Chikitsya Purusha***
- D. Modern diagnostic reports

Correct Answer: C

12. Which aspect of *Chikitsya Purusha* helps in assessing mental tolerance?

- A. Sharira
- B. Atma
- C. Indriya
- D. **Satva**

Correct Answer: D

13. The *Chikitsya Purusha* concept reflects which core philosophy of Ayurveda?

- A. Reductionism
- B. Specialization
- C. **Holism**
- D. Mechanism

Correct Answer: C

14. The eligibility of a person for treatment in Ayurveda depends upon:

- A. Age only
- B. Gender only
- C. Economic status
- D. **Assessment of Chikitsya Purusha**

Correct Answer: D

15. *Indriya* in *Chikitsya Purusha* primarily refers to:

- A. Motor organs only
- B. Mind
- C. **Sense organs and perception capacity**
- D. Soul

Correct Answer: C

16. The concept of *Chikitsya Purusha* is studied under which subject?

- A. Dravyaguna
- B. Kriya Sharir
- C. **Rachana Sharir**
- D. Rasashastra

Correct Answer: C

VAC-_Ayurveda_Syllabus[1]

17. Which university syllabus includes *Introduction to Chikitsya Purusha* for BA students?

- A. DU
- B. JNU
- C. AMU
- D. **BHU (NEP)**

Correct Answer: D

VAC-_Ayurveda_Syllabus[1]

18. *Chikitsya Purusha* helps the physician mainly in:

- A. Diagnosis only
- B. Prognosis only
- C. **Diagnosis, prognosis, and treatment planning**
- D. Surgery

Correct Answer: C

19. Ayurveda considers *Chikitsya Purusha* because:

- A. All diseases are same
- B. All patients are same
- C. **Each individual differs in constitution and response**
- D. Medicines are universal

Correct Answer: C

20. Which statement is most appropriate regarding *Chikitsya Purusha*?

- A. Treatment focuses only on disease
- B. Body and mind are separate
- C. **Treatment considers body, mind, and soul together**
- D. Only physical symptoms matter

Correct Answer: C

MCQs: Introduction of Marma (BHU | NEP | BA First Semester)

1. In Ayurveda, the term Marma refers to:

- A. Only bones of the body
- B. Vital points where muscles, vessels, ligaments, bones and joints meet
- C. Only nerve endings
- D. External wounds

Correct Answer: B

2. According to classical Ayurveda, the total number of Marma in the human body is:

- A. 101
- B. 107
- C. 108
- D. 110

Correct Answer: B

3. The concept of Marma is mainly described in which Ayurvedic text?

- A. Ashtanga Hridaya
- B. Sushruta Samhita
- C. Charaka Samhita
- D. Bhavaprakasha

Correct Answer: B

4. Marma are considered important primarily because:

- A. They help in digestion
- B. Injury to them can cause serious harm or death
- C. They control only muscular movement
- D. They regulate sleep

Correct Answer: B

5. Which of the following structural elements are involved in the formation of Marma?

- A. Mamsa (muscle)
- B. Sira (vessels)
- C. Snayu (ligaments)
- D. All of the above

Correct Answer: D

6. Injury to Marma is known in Ayurveda as:

- A. Roga
- B. Marmabhighata
- C. Shotha
- D. Vrana

Correct Answer: B

7. Which Acharya is known as the “Father of Surgery” and gave detailed description of Marma?

- A. Charaka
- B. Vagbhata
- C. Sushruta
- D. Kashyapa

Correct Answer: C

8. Marma are classified mainly on the basis of:

- A. Color
- B. Size
- C. Structure and effect of injury
- D. Age

Correct Answer: C

9. Which of the following is NOT a structural component of Marma?

- A. Asthi (bone)
- B. Sandhi (joint)
- C. Tvak (skin only)
- D. Sira (vessels)

Correct Answer: C

10. The knowledge of Marma is most important in:

- A. Kayachikitsa
- B. Shalya Tantra
- C. Rasashastra
- D. Kaumarbhritya

Correct Answer: B

11. Marma science is useful in Ayurveda mainly for:

- A. Surgical safety
- B. Diagnosis of diseases
- C. Understanding nutrition
- D. Preparing medicines

Correct Answer: A

12. Which principle is emphasized while performing surgery regarding Marma?

- A. Marma can be ignored
- B. Marma should be avoided during surgical procedures
- C. Marma should always be cut
- D. Marma have no clinical importance

Correct Answer: B

13. Marma are considered seats of:

- A. Only Kapha
- B. Prana (life energy)
- C. Only blood
- D. Only muscles

Correct Answer: B

14. According to Ayurveda, damage to Marma may result in:

- A. Mild itching only
- B. Loss of consciousness or death
- C. Improved health
- D. No effect

Correct Answer: B

15. In modern correlation, Marma points are closest to:

- A. Blood groups
- B. Reflex points / vital points
- C. Hormones
- D. Digestive enzymes

Correct Answer: B

SECTION A: MCQs on Nāḍī (Idā, Piṅgalā, Suṣumṇā)

Q1. How many principal Nāḍīs are primarily emphasized in Ayurveda and Yoga texts?

- A. 3
- B. 5
- C. 7
- D. 10

Correct Answer: A

Q2. Idā Nāḍī is predominantly associated with which side of the body?

- A. Right side
- B. Left side
- C. Central canal
- D. Peripheral region

Correct Answer: B

Q3. Piṅgalā Nāḍī represents which physiological principle?

- A. Cooling and calming energy
- B. Nourishment of tissues

- C. Heating and activating energy
- D. Elimination of wastes

Correct Answer: C

Q4. Which Nāḍī is considered the central channel through which Kuṇḍalinī energy ascends?

- A. Idā
- B. Piṅgalā
- C. Suṣumṇā
- D. Gandhārī

Correct Answer: C

Q5. Idā Nāḍī is functionally related to which Doṣa?

- A. Pitta
- B. Kapha
- C. Vāta
- D. All three Doṣas

Correct Answer: C

Q6. Which Nāḍī is associated with the right nostril breathing?

- A. Idā
- B. Suṣumṇā
- C. Piṅgalā
- D. Sarasvatī

Correct Answer: C

Q7. The balanced functioning of Idā and Piṅgalā results in activation of:

- A. Kapha dominance
- B. Suṣumṇā Nāḍī
- C. Srotas circulation
- D. Agni increase

Correct Answer: B

SECTION B: MCQs on Srotas

Q8. In Ayurveda, the term *Srotas* refers to:
A. Nerves only
B. Blood vessels only
C. Channels of circulation and transformation
D. Bones and joints

Correct Answer: C

Q9. Which Acharya described Srotas as channels responsible for transportation and nourishment?
A. Charaka
B. Sushruta
C. Vagbhata
D. Kashyapa

Correct Answer: A

Q10. The primary function of Srotas is to:
A. Produce Doshas
B. Store Dhatus
C. Transport substances within the body
D. Eliminate only waste products

Correct Answer: C

Q11. Which of the following is NOT a type of Srotas?
A. Prāṇavaha
B. Rasavaha
C. Asthivaha
D. Majjāsthāna

Correct Answer: D

Q12. Srotodushti refers to:
A. Normal functioning of channels
B. Congenital deformity
C. Pathological impairment of Srotas
D. Surgical injury

Correct Answer: C

Q13. Which factor is a common cause of Srotodushti?

- A. Balanced diet
- B. Proper lifestyle
- C. Improper Ahāra and Vihāra
- D. Seasonal regimen

Correct Answer: C

SECTION C: MCQs on Roga & Vikriti Vigyan

Q14. *Roga* in Ayurveda primarily means:

- A. External injury
- B. Disease or disorder
- C. Surgical condition
- D. Genetic defect

Correct Answer: B

Q15. Vikriti Vigyan deals with the study of:

- A. Normal body structure
- B. Surgical procedures
- C. Pathological changes and disease processes
- D. Medicinal plants

Correct Answer: C

Q16. Which of the following is the main cause of Roga according to Ayurveda?

- A. Trauma only
- B. Infection only
- C. Imbalance of Doṣas
- D. Heredity only

Correct Answer: C

Q17. The abnormal state of Doṣa, Dhātu, and Mala is known as:

- A. Prakriti
- B. Swastha
- C. Vikriti
- D. Agni

Correct Answer: C

Q18. Which of the following is studied under Vikriti Vigyan?

- A. Normal digestion
- B. Seasonal routine
- C. Etiopathogenesis of diseases
- D. Yoga practices

Correct Answer: C

Q19. Roga Parīkṣā mainly includes examination of:

- A. Mind only
- B. Body only
- C. Doṣa, Dhātu, Mala
- D. Bones and joints

Correct Answer: C

Q20. The primary objective of studying Roga & Vikriti Vigyan is to:

- A. Perform surgery
- B. Prescribe medicines only
- C. Understand disease for proper management
- D. Promote spiritual growth

Correct Answer: C

MCQs: Etiopathological Aspects & Kriya Kāla (BHU – NEP, BA 1st Sem)

1. In Ayurveda, the term Etiopathology mainly refers to:

- A. Treatment methods only
- B. Study of anatomy
- C. **Causes and development of disease**
- D. Surgical procedures

Answer: C

2. The Ayurvedic concept that explains the progressive stages of disease development is known as:

- A. Tridosha
- B. Shad Rasa
- C. **Kriya Kāla**
- D. Srotas

Answer: C

3. How many stages are described in Shat Kriya Kāla?

- A. Four
- B. Five
- C. **Six**
- D. Seven

Answer: C

4. The first stage of Kriya Kāla, where Doshas start accumulating in their own sites, is called:

- A. Prasara
- B. Sthāna Samshraya
- C. **Sanchaya**
- D. Vyakti

Answer: C

5. Prasara stage of Kriya Kāla indicates:

- A. Localization of disease
- B. Manifestation of disease
- C. **Spread of aggravated Dosha from its original site**
- D. Complication stage

Answer: C

6. In which stage of Kriya Kāla does Dosha–Dushya Sammurchana occur?

- A. Sanchaya
- B. Prakopa
- C. Prasara
- D. **Sthāna Samshraya**

Answer: D

7. The stage where clear signs and symptoms of disease appear is:

- A. Bheda
- B. **Vyakti**
- C. Prakopa
- D. Sanchaya

Answer: B

8. Bheda stage of Kriya Kāla is characterized by:

- A. Disease prevention
- B. Mild symptoms
- C. **Complications and differentiation of disease**
- D. Dosha accumulation

Answer: C

9. Improper diet and lifestyle primarily lead to abnormality of:

- A. Dhatus only
- B. Malas only
- C. **Dosha balance**
- D. Indriyas

Answer: C

10. According to Ayurveda, Mandagni (low digestive fire) mainly causes:

- A. Tissue depletion
- B. Increased Ojas
- C. **Formation of Ama**
- D. Excessive sweating

Answer: C

11. Ama in Ayurveda is best described as:

- A. Pure nutrient essence
- B. Waste product
- C. **Undigested, toxic metabolic product**
- D. Hormonal secretion

Answer: C

12. Which Dosha is primarily responsible for digestive disorders?

- A. Vata
- B. **Pitta**
- C. Kapha
- D. Ojas

Answer: B

13. Excessive intake of cold, heavy food mainly aggravates:

- A. Vata
- B. Pitta
- C. **Kapha**
- D. Rakta

Answer: C

14. Diseases affecting the musculoskeletal system are commonly related to imbalance of:

- A. Kapha Dosha
- B. **Vata Dosha**
- C. Pitta Dosha
- D. Ojas

Answer: B

15. According to Kriya Kāla, early intervention is most effective during:

- A. Vyakti stage
- B. Bheda stage
- C. **Sanchaya and Prakopa stages**
- D. Complication stage

Answer: C

16. Which system is mainly affected when Kapha Dosha is aggravated?

- A. Nervous system
- B. Circulatory system
- C. **Respiratory system**
- D. Endocrine system

Answer: C

17. The concept of Roga and Vikriti Vigyan mainly deals with:

- A. Surgical techniques
- B. Pharmacology
- C. **Disease causation and pathology**
- D. Yoga therapy

Answer: C

18. Seasonal variation influencing disease occurrence is related to:

- A. Agni
- B. Prakriti
- C. **Dosha prakopa according to Ritu**
- D. Dhatu formation

Answer: C

19. Prevention of disease at an early stage is emphasized in Ayurveda through:

- A. Surgery
- B. Medication only
- C. **Understanding Kriya Kāla**
- D. Emergency care

Answer: C

20. According to Ayurveda, imbalance of Dosha, Dhātu, and Mala ultimately results in:

- A. Health
- B. Longevity
- C. **Disease (Vyadhi)**
- D. Immunity

Answer: C

Multiple Choice Questions (MCQs)

(Exam-oriented | Conceptual + Clinical focus)

Section A: Abnormal Dosha

1. Which Dosha is primarily responsible for all movements in the body?

- A. Pitta
- B. Kapha
- C. Vata
- D. Ojas

Answer: C. Vata

2. Excessive dryness, tremors and constipation indicate aggravation of which Dosha?

- A. Kapha
- B. Pitta
- C. Vata
- D. Ojas

Answer: C. Vata

3. Hyperacidity, inflammation and excessive thirst are clinical features of abnormal:

- A. Kapha
- B. Vata
- C. Pitta
- D. Mala

Answer: C. Pitta

4. Obesity, lethargy and excessive mucus production are caused by imbalance of:

- A. Vata
- B. Pitta
- C. Kapha
- D. Agni

Answer: C. Kapha

Section B: Abnormal Dhatu

5. Which Dhatu provides nourishment to all tissues and maintains strength?

- A. Rakta
- B. Mamsa
- C. Rasa
- D. Asthi

Answer: C. Rasa

6. Anemia in Ayurveda is mainly associated with abnormality of which Dhatu?

- A. Rasa
- B. Rakta
- C. Meda
- D. Majja

Answer: B. Rakta

7. Weak bones and joint pain indicate depletion of:

- A. Meda Dhatu
- B. Majja Dhatu
- C. Asthi Dhatu
- D. Shukra Dhatu

Answer: C. Asthi Dhatu

8. Excess accumulation of fat is related to abnormality of:

- A. Rasa
- B. Rakta
- C. Meda
- D. Majja

Answer: C. Meda

Section C: Mala (Waste Products)

9. Which of the following is NOT considered Mala?

- A. Purisha (faeces)
- B. Mutra (urine)
- C. Sveda (sweat)
- D. Ojas

Answer: D. Ojas

10. Constipation occurs due to improper elimination of:

- A. Mutra
- B. Sveda
- C. Purisha
- D. Rasa

Answer: C. Purisha

11. Excessive sweating indicates imbalance in:

- A. Dosha
- B. Dhatu
- C. Mala
- D. Agni

Answer: C. Mala

Section D: Agni

12. Agni in Ayurveda is mainly responsible for:

- A. Circulation
- B. Digestion and metabolism
- C. Respiration
- D. Excretion

Answer: B. Digestion and metabolism

13. Mandagni refers to:

- A. Excessive digestive fire
- B. Balanced digestion

- C. Weak digestion
- D. Irregular digestion

Answer: C. Weak digestion

14. Which Agni condition causes formation of Ama (toxins)?

- A. Tikshnagni
- B. Samagni
- C. Vishamagni
- D. Mandagni

Answer: D. Mandagni

Section E: Ojas

15. Ojas is best described as:

- A. Waste product
- B. Digestive enzyme
- C. Essence of all Dhatus
- D. Type of Dosha

Answer: C. Essence of all Dhatus

16. Loss of immunity and frequent illness indicate depletion of:

- A. Agni
- B. Ojas
- C. Kapha
- D. Mala

Answer: B. Ojas

Section F: Clinical Effects (Integrated)

17. Ama formation primarily results from:

- A. Excess Kapha
- B. Weak Agni
- C. Excess Pitta
- D. Depletion of Ojas

Answer: B. Weak Agni

18. Which system explains disease development based on Dosha–Dhatu–Mala imbalance?

- A. Tridosha theory
- B. Panchamahabhuta theory
- C. Kriya-Kala
- D. Shad-Padartha

Answer: C. Kriya-Kala

Section G: Principles Convenient for Society to Avoid Disease

19. Daily regimen (Dinacharya) is mainly aimed at:

- A. Treatment of disease
- B. Prevention of disease
- C. Surgical management
- D. Emergency care

Answer: B. Prevention of disease

20. Seasonal regimen in Ayurveda is known as:

- A. Dinacharya
- B. Ritucharya
- C. Sadvrutta
- D. Rasayana

Answer: B. Ritucharya

21. Ethical conduct and healthy behavior in society are included under:

- A. Agni
- B. Sadvrutta
- C. Dhatu
- D. Mala

Answer: B. Sadvrutta

22. Which principle emphasizes community-friendly, preventive health care?

- A. Rasayana
- B. Shamana

- C. Swasthavritta
- D. Shodhana

Answer: C. Swasthavritta

Section H: NEP-Focused Conceptual MCQs

23. The main objective of Ayurveda under NEP-VAC is:

- A. Curative medicine only
- B. Surgery training
- C. Preventive and promotive health
- D. Pharmaceutical manufacturing

Answer: C. Preventive and promotive health

24. Ayurveda considers health as:

- A. Absence of disease
- B. Balance of Dosha, Dhatu, Mala and Agni
- C. Physical fitness only
- D. Mental happiness only

Answer: B. Balance of Dosha, Dhatu, Mala and Agni
