

# MCQs: Medicinal Substances and Their Attributes

(BHU | NEP | BA First Semester | Ayurveda – Dravyaguna)

## A. Basic Concepts (Dravya, Guna, Karma)

1. In Ayurveda, the term *Dravya* refers to:

- A. Action only
- B. Quality only
- C. Substance that possesses guna and karma
- D. Disease-causing factor

Correct Answer: C

---

2. Which of the following is NOT included in *Shad Padartha*?

- A. Dravya
- B. Guna
- C. Karma
- D. Roga

Correct Answer: D

---

3. *Guna* in Ayurveda primarily denotes:

- A. Therapeutic action
- B. Physical and functional qualities of a substance
- C. Dosha imbalance
- D. Method of preparation

Correct Answer: B

---

4. How many *Gunas* are classically described in Ayurveda?

- A. 10
- B. 20
- C. 24
- D. 6

Correct Answer: B

---

5. *Karma* of a medicinal substance refers to its:

- A. Chemical composition
- B. Taste

- C. Therapeutic action on the body
- D. Botanical classification

**Correct Answer: C**

---

## **B. Relation Between Dravya, Guna, and Karma**

**6. According to Ayurveda, *Karma* is dependent upon:**

- A. Only Rasa
- B. Only Virya
- C. Guna and Dravya
- D. Dosha only

**Correct Answer: C**

---

**7. The effect of a drug that occurs after digestion is called:**

- A. Rasa
- B. Virya
- C. Vipaka
- D. Prabhava

**Correct Answer: C**

---

**8. When the action of a drug cannot be explained by Rasa, Guna, Virya, or Vipaka, it is called:**

- A. Karma
- B. Prabhava
- C. Agni
- D. Ojas

**Correct Answer: B**

---

## **C. Origin of Medicinal Substances**

**9. According to origin, medicinal substances are classified into how many main groups?**

- A. Two
- B. Three
- C. Four
- D. Five

**Correct Answer: B**

---

**10. Plant-origin drugs in Ayurveda are known as:**

- A. Jangama
- B. Audbhida
- C. Parthiva
- D. Apya

**Correct Answer: B**

---

**11. Drugs obtained from animals are classified under:**

- A. Audbhida
- B. Khanija
- C. Jangama
- D. Panchabhautika

**Correct Answer: C**

---

**12. Mineral-origin drugs are known as:**

- A. Audbhida
- B. Jangama
- C. Khanija
- D. Rasayana

**Correct Answer: C**

---

## **D. Classification of Medicinal Substances**

**13. Classification of drugs based on therapeutic action is called:**

- A. Botanical classification
- B. Pharmacological classification
- C. Morphological classification
- D. Chemical classification

**Correct Answer: B**

---

**14. Drugs that improve general health and longevity are known as:**

- A. Vajikarana
- B. Rasayana
- C. Deepana
- D. Pachana

**Correct Answer: B**

---

**15. Drugs used to increase digestive fire (*Agni*) are called:**

- A. Balya
- B. Deepana
- C. Shothahara
- D. Bhedana

**Correct Answer: B**

---

### **E. Exam-Focused Conceptual MCQs**

**16. Which Padartha explains the *inherent action* of a drug?**

- A. Guna
- B. Karma
- C. Dravya
- D. Rasa

**Correct Answer: B**

---

**17. The substance which acts as the *samavayi karana* (material cause) is:**

- A. Guna
- B. Karma
- C. Dravya
- D. Dosha

**Correct Answer: C**

---

**18. According to Ayurveda, medicinal substances act on the body mainly through:**

- A. Tridosha
- B. Sapta Dhatu
- C. Mala
- D. All of the above

**Correct Answer: D**

---

**19. Which attribute of Dravya is responsible for immediate action?**

- A. Vipaka
- B. Virya

- C. Rasa
- D. Prabhava

**Correct Answer: B**

---

**20. The study of drugs along with their properties and actions in Ayurveda is known as:**

- A. Rasa Shastra
- B. Dravyaguna Vigyana
- C. Kayachikitsa
- D. Agada Tantra

**Correct Answer: B**

## **MCQs: Medicinal Plants, Plant Products & Entrepreneurship**

*(BHU – NEP | BA First Semester | Exam Oriented)*

**1. The branch of Ayurveda that deals with medicinal plants and their properties is known as:**

- A. Rasashastra
- B. Dravyaguna
- C. Agada Tantra
- D. Kayachikitsa

**Correct Answer: B. Dravyaguna**

---

**2. Medicinal plants are primarily valued in Ayurveda for their:**

- A. Color and fragrance
- B. Nutritional value only
- C. Dravya, Guna, Karma
- D. Commercial branding

**Correct Answer: C. Dravya, Guna, Karma**

---

**3. Which of the following is a commonly used medicinal plant product?**

- A. Plastic resin
- B. Essential oils
- C. Synthetic vitamins
- D. Artificial sweeteners

**Correct Answer:** B. Essential oils

---

**4. The economic value derived from cultivation, processing, and sale of medicinal plants refers to:**

- A. Therapeutic importance
- B. Cultural importance
- C. Commercial importance
- D. Spiritual importance

**Correct Answer:** C. Commercial importance

---

**5. Which plant is widely used in Ayurveda for immunity enhancement?**

- A. Neem
- B. Tulsi
- C. Ashwagandha
- D. All of the above

**Correct Answer:** D. All of the above

---

**6. Cultivation of medicinal plants helps in:**

- A. Environmental degradation
- B. Sustainable livelihood
- C. Loss of biodiversity
- D. Industrial pollution

**Correct Answer:** B. Sustainable livelihood

---

**7. Which sector offers maximum entrepreneurial opportunities related to medicinal plants?**

- A. Information Technology
- B. Ayurvedic pharmaceutical industry

- C. Heavy engineering
- D. Textile industry

**Correct Answer:** B. Ayurvedic pharmaceutical industry

---

**8. The process of growing medicinal plants under controlled agricultural practices is called:**

- A. Wild harvesting
- B. Plantation forestry
- C. Medicinal plant cultivation
- D. Genetic engineering

**Correct Answer:** C. Medicinal plant cultivation

---

**9. Which of the following is NOT a plant-based Ayurvedic product?**

- A. Churna
- B. Kwatha
- C. Bhasma
- D. Taila

**Correct Answer:** C. Bhasma

---

**10. The scope of entrepreneurship in medicinal plants mainly includes:**

- A. Export of raw drugs
- B. Herbal cosmetics
- C. Ayurvedic food products
- D. All of the above

**Correct Answer:** D. All of the above

---

**11. Medicinal plants contribute to the economy mainly through:**

- A. Import dependency
- B. Rural employment
- C. Urban migration
- D. Industrial automation

**Correct Answer:** B. Rural employment

---

**12. Which government initiative promotes medicinal plant cultivation in India?**

- A. Make in India
- B. Digital India
- C. National AYUSH Mission
- D. Skill India

**Correct Answer:** C. National AYUSH Mission

---

**13. Commercial utilization of medicinal plants should follow:**

- A. Over-exploitation
- B. Ethical harvesting
- C. Illegal trade
- D. Deforestation

**Correct Answer:** B. Ethical harvesting

---

**14. Which form of entrepreneurship involves preparing herbal soaps, creams, and oils?**

- A. Agricultural entrepreneurship
- B. Pharmaceutical entrepreneurship
- C. Cosmetic entrepreneurship
- D. Industrial entrepreneurship

**Correct Answer:** C. Cosmetic entrepreneurship

---

**15. The main objective of medicinal plant entrepreneurship is:**

- A. Profit only
- B. Conservation only
- C. Health promotion with sustainability
- D. Export restriction

**Correct Answer:** C. Health promotion with sustainability

---

**16. Which plant product is widely used in Ayurvedic digestion-related medicines?**

- A. Aloe vera gel
- B. Triphala
- C. Sandalwood oil
- D. Neem oil

**Correct Answer:** B. Triphala

---

**17. Cultivation of medicinal plants reduces:**

- A. Farmer income
- B. Soil fertility
- C. Pressure on wild resources
- D. Employment

**Correct Answer:** C. Pressure on wild resources

---

**18. Medicinal plant-based entrepreneurship is important because it:**

- A. Promotes synthetic drugs
- B. Preserves traditional knowledge
- C. Increases chemical dependency
- D. Eliminates Ayurveda

**Correct Answer:** B. Preserves traditional knowledge

---

**19. Which of the following is an example of a plant-derived commercial product?**

- A. Antibiotic injection
- B. Herbal tea
- C. Synthetic syrup
- D. Plastic capsule

**Correct Answer:** B. Herbal tea

---

**20. According to NEP-based VAC syllabus, medicinal plants study is included to promote:**

- A. Only academic learning
- B. Theoretical knowledge without application
- C. Skill development and entrepreneurship
- D. Examination burden

**Correct Answer:** C. Skill development and entrepreneurship

## **A. Introduction to Medicinal Chemistry**

### **1. Medicinal Chemistry mainly deals with the study of:**

- A. Disease diagnosis
- B. Chemical nature of drugs and their actions
- C. Surgical instruments
- D. Hospital management

**Answer:** B

---

### **2. In Ayurveda, medicinal chemistry is most closely related to the study of:**

- A. Yantra
- B. Dravya, Guna, Karma
- C. Shalya Tantra
- D. Jyotish

**Answer:** B

---

### **3. The primary aim of medicinal chemistry is to:**

- A. Prepare artificial drugs only
- B. Understand structure–activity relationship of drugs
- C. Eliminate herbal medicines
- D. Promote allopathy

**Answer:** B

---

### **4. Which of the following best defines Medicinal Chemistry?**

- A. Study of medicinal plants only
- B. Study of drug synthesis, properties, and biological effects
- C. Study of minerals only
- D. Study of nutrition

**Answer:** B

---

**5. Medicinal chemistry bridges the gap between:**

- A. Botany and zoology
- B. Ayurveda and modern pharmaceutical science
- C. Surgery and medicine
- D. Astrology and medicine

**Answer: B**

---

## **B. Importance of Medicinal Chemistry in Ayurveda Research**

**6. In Ayurveda research, medicinal chemistry helps mainly in:**

- A. Chanting mantras
- B. Drug standardization and validation
- C. Performing Panchakarma
- D. Pulse diagnosis

**Answer: B**

---

**7. Identification of active principles in medicinal plants is possible through:**

- A. Astrology
- B. Medicinal chemistry techniques
- C. Religious texts
- D. Traditional beliefs

**Answer: B**

---

**8. Which of the following is a major contribution of medicinal chemistry to Ayurveda?**

- A. Preservation of manuscripts
- B. Scientific validation of herbal drugs
- C. Expansion of rituals
- D. Temple medicine

**Answer: B**

---

**9. Medicinal chemistry supports Ayurveda research by:**

- A. Rejecting classical texts
- B. Explaining drug action at molecular level
- C. Ignoring plant sources
- D. Avoiding experimentation

**Answer: B**

---

**10. Quality control of Ayurvedic formulations is ensured by:**

- A. Guess work
- B. Medicinal chemistry analysis
- C. Oral tradition only
- D. Religious authority

**Answer: B**

---

## **C. Medicinal Chemistry and Entrepreneurship on Plants & Plant Products**

**11. Medicinal chemistry promotes entrepreneurship mainly through:**

- A. Import of drugs
- B. Development of plant-based products
- C. Hospital administration
- D. Medical tourism only

**Answer: B**

---

**12. Which of the following is an entrepreneurial opportunity mentioned in the syllabus?**

- A. Engineering industries
- B. Cultivation and processing of medicinal plants
- C. Software development
- D. Automobile industry

**Answer: B**

---

**13. Value addition to plant products is achieved by:**

- A. Selling raw plants only
- B. Chemical processing and formulation development
- C. Ignoring quality
- D. Over-harvesting

**Answer: B**

---

**14. Medicinal chemistry helps entrepreneurs by:**

- A. Reducing plant diversity
- B. Developing standardized herbal products
- C. Discouraging traditional knowledge
- D. Limiting market access

**Answer: B**

---

**15. Which sector benefits directly from medicinal chemistry-based entrepreneurship?**

- A. Textile industry
- B. Ayurvedic pharmaceutical industry
- C. Heavy machinery
- D. Mining

**Answer: B**

---

### **D. Applied & Conceptual MCQs**

**16. The commercial importance of medicinal plants is enhanced through:**

- A. Ritual use only
- B. Scientific processing and formulation
- C. Superstition
- D. Oral folklore

**Answer: B**

---

**17. Medicinal chemistry contributes to “Make in India” by:**

- A. Importing chemicals
- B. Promoting indigenous herbal products
- C. Discouraging MSMEs
- D. Ignoring rural economy

**Answer: B**

---

**18. Which of the following best reflects NEP-2020 objectives?**

- A. Rote learning
- B. Skill-based and entrepreneurship-oriented education
- C. Only theoretical learning
- D. Exam-centric learning

**Answer: B**

---

**19. Start-ups in Ayurveda mainly rely on:**

- A. Synthetic chemicals only
- B. Medicinal plant-based formulations

- C. Imported drugs
- D. Non-regulated products

**Answer: B**

---

**20. Medicinal chemistry as a discipline encourages:**

- A. Unscientific practices
- B. Innovation, research, and self-employment
- C. Dependency on imports
- D. Decline of Ayurveda

**Answer: B**
